<b>RCP RECOMMENDATIONS</b>
<p>RCP in agreeance</p> <p>A review of weights from the 2024 titles has been factored into the rule change. Weights used to review this rule change by the RCP are attached at the bottom of the rule change.</p>

<b>Current Rule Wording (if an existing rule)</b>
<p>Minimum weights for Driver combined with Kart are set out in the Table below:</p> <p>Outlaw 165kg</p>

<b>Proposed Rule</b>
<p>Minimum weights for Driver combined with Kart are set out in the Table below:</p> <p>Outlaw 175kg</p>

**Clearly explain the new rule/changes requested.**

The approximate national average weight for a male is 87kg and female is 72kg in Australia.  
The approximate average weight for an Outlaw Kart is approximately 100kg taking into consideration the additional weight of an outlaw motor, the addition of a wing, larger exhaust and chassis in comparison to KT & 125 Karts.

**What situation/event/scenario has created this proposed rule change**

Seeing many outlaw drivers and karts being in excess of 180kg when weighing at tracks scales in comparison to very few weighing around the 165kg with most actually being from 180 – 210kg +. I feel 180kg is a fair and reasonable weight for the 'average' driver and kart giving it a fairer playing field than it currently is at 165kg.
